

LeadHub

Lead Generation · CRM · Follow-up · Conversion

Infrastructure for the independent loan-agent economy

A production-ready, multi-tenant SaaS that gives each loan agent a branded public website, secure CRM, lead intelligence, and conversion workflow.

Live on Vercel

Supabase RLS

Brevo SMTP

Mobile-first

Independent loan agents need more than a digital brochure.

Fragmented lead intake

Enquiries arrive through calls, WhatsApp, referrals, and forms without one reliable system.

Slow follow-up

Without reminders and a usable CRM, high-intent borrowers can go cold.

Limited digital identity

Agents need branded, mobile-first pages that communicate trust and services clearly.

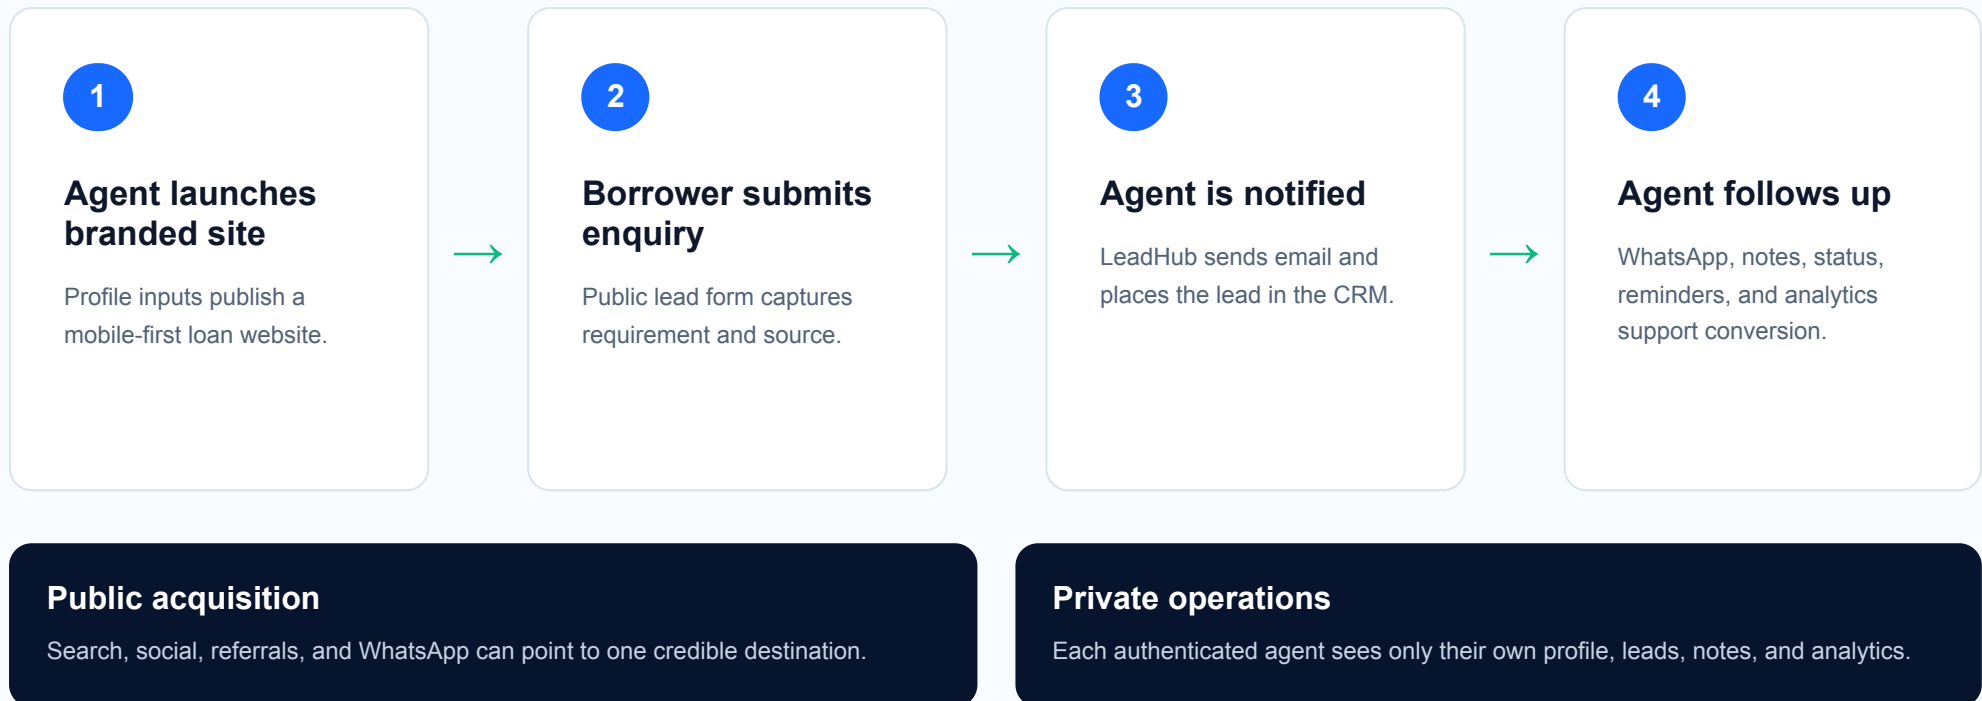

Low visibility

Without source and conversion analytics, agents cannot see what is generating demand.

LeadHub connects the full path from public discovery to organised follow-up and conversion.

A closed-loop customer and agent journey

A working SaaS foundation with meaningful product depth

Public agent sites

Mobile-first branded pages with services, EMI calculator, WhatsApp, and lead form.

Lead CRM

Statuses, notes, source tracking, WhatsApp contact, deletion, and CSV export.

Agent branding

Logo upload, primary color, hero copy, banner, location, services, slug, and domain groundwork.

Growth analytics

Website visits, lead submissions, WhatsApp clicks, conversion percentage, and reminders.

Lifecycle controls

Free-trial countdown, expired-account locking, and support reactivation flow.

Secure tenancy

Supabase Auth, Postgres, Storage, and Row Level Security isolate every agent workspace.

Transactional email

Brevo SMTP confirmation and new-lead notifications with server-side credentials.

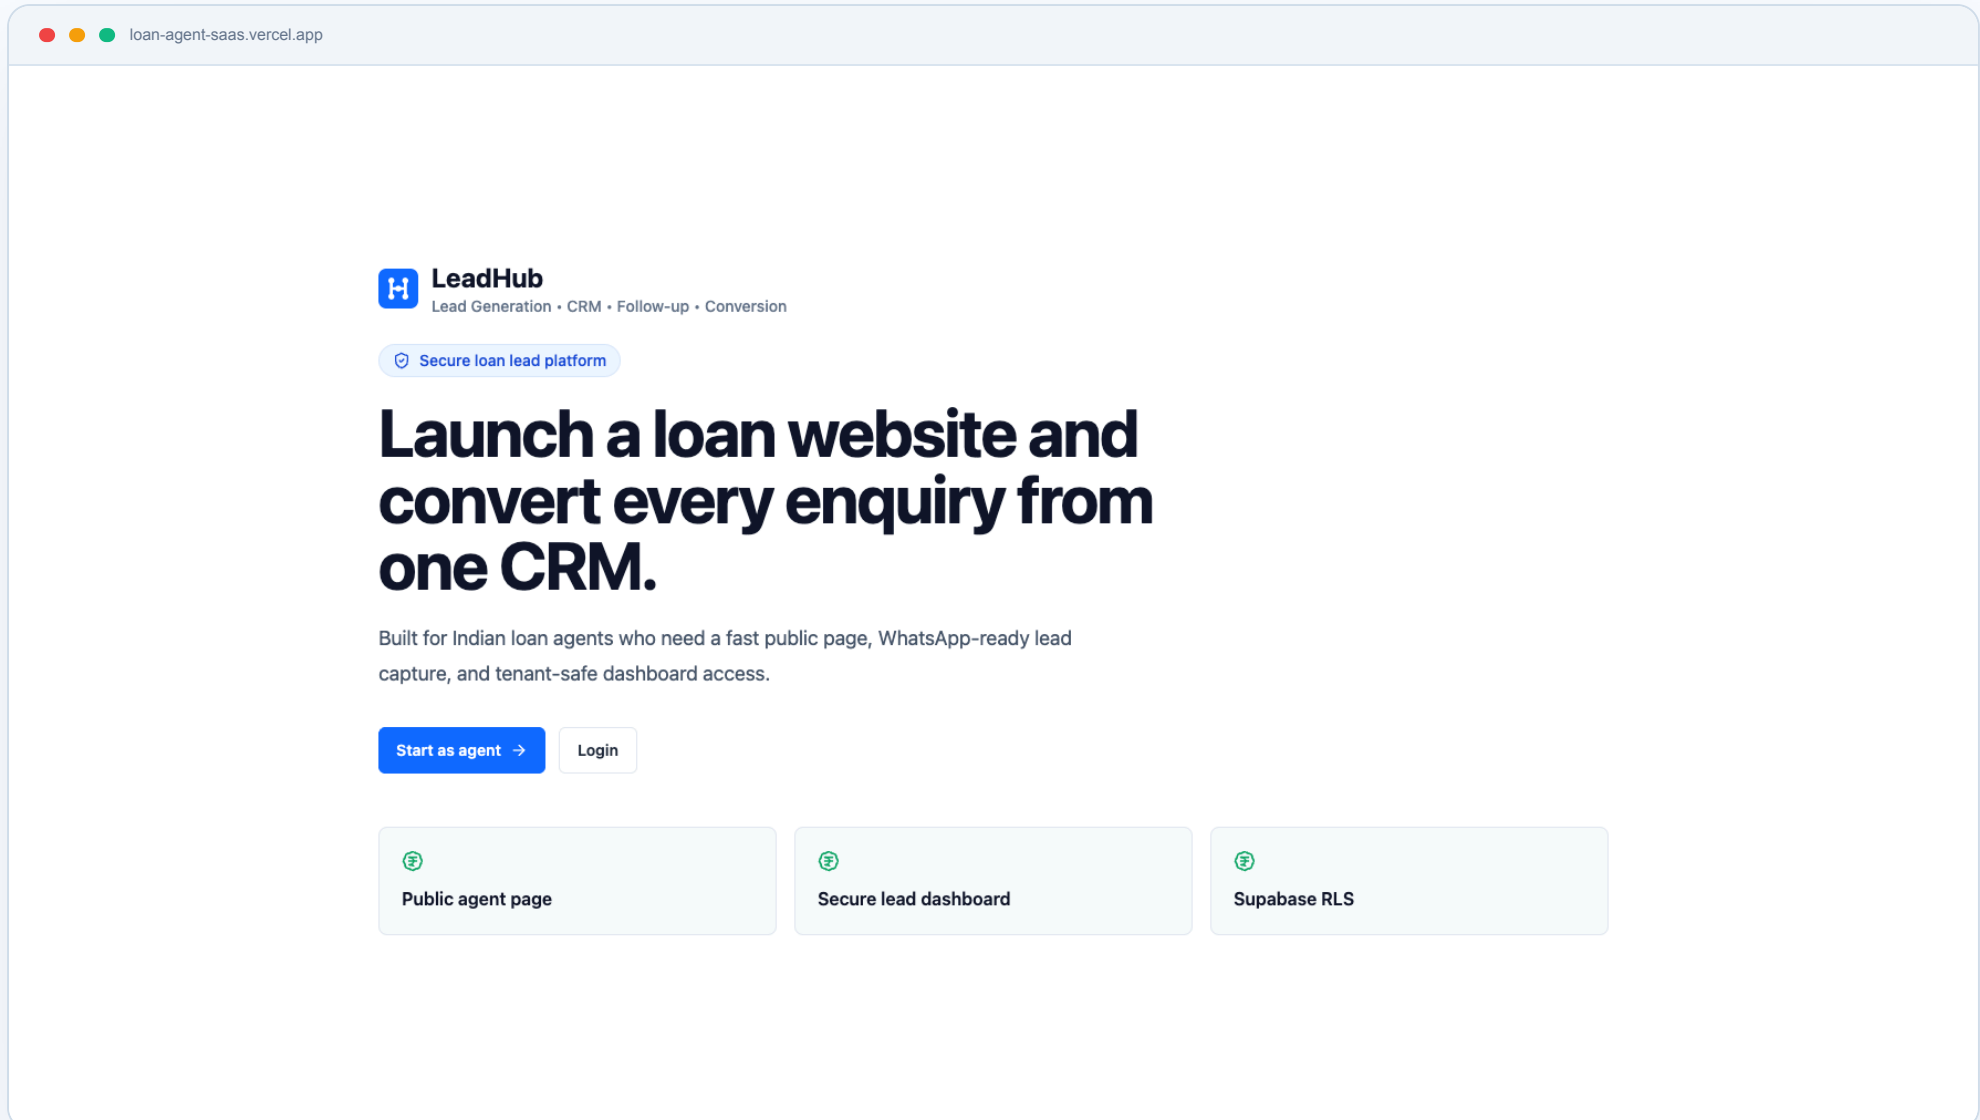

Production delivery

Next.js App Router, TypeScript, Tailwind CSS, Supabase, GitHub, and Vercel.

A clear SaaS proposition for loan agents

LeadHub positions the platform around lead generation, CRM, follow-up, and conversion.

Business identity and website setup in one flow

Signup collects authentication, branding, logo, address, services, and public-page configuration.

Create account and profile

Protected access to each agent workspace

Supabase email/password authentication protects dashboard routes and tenant-owned data.

The screenshot shows a web browser window with the address bar displaying 'loan-agent-saas.vercel.app'. The main content area features a light blue background with a central white login form. The form is titled 'Login' and includes the instruction 'Open your loan lead dashboard.' Below this, there are two input fields: 'Email' and 'Password'. A blue button with a right arrow icon and the text 'Login' is positioned below the password field. At the bottom of the form, there is a link that says 'New agent? [Create an account](#)'.

Each agent receives a configurable lead-generation page

Loan services, agent identity, WhatsApp CTA, EMI tools, contact details, and lead capture work together.

Designed for the device borrowers use first

One responsive experience

Public agent pages keep the brand, services, CTAs, and forms usable on compact screens without horizontal clipping.

- Touch-friendly Apply and WhatsApp actions
- Readable service catalogue and agent identity
- Responsive lead form and EMI calculator
- Mobile lead generation without an app install

The public site is more than a profile page

01

Service catalogue

Agents choose from a broad set of loan and financial products.

02

EMI calculator

Borrowers can estimate repayments before submitting an enquiry.

03

Lead capture

Validated customer, loan, income, source, and address fields create structured CRM records.

04

WhatsApp conversion

Trackable CTAs connect borrowers and agents through a familiar channel.

05

Address assistance

Pincode lookup improves city, district, and state data quality.

06

Agent trust

Logo, location, contact details, and tailored copy make every page distinct.

Agents configure their identity without engineering support

Brand color, hero copy, logo, services, location, slug, and custom-domain groundwork are managed in one profile.
